

Advantages (time recording)

Automatic control of working time models

Legal minimum values according to the number of working days/week
For each company, the statutory minimum value for Germany (Laundry) and Austria is shown for one week with one to six working days. The values can be overwritten according to your specifications.

Time recording anywhere and at any time via the chatbot is ideal for employees working on assignments outside of the company.

Employees can record their working times and breaks using a mobile Messenger application, e.g. Telegram. Enter your working time directly by either using the commands 'I'm here' or 'Start working time' or the help buttons that will guide you.
