Task details

Then, enter a task ID, a task name and a description. If necessary, you can also select a customer, provided you have already created one under <u>Customers</u>.

Select the task manager and set the task duration (start and end date) so that the progress can be monitored over time.

Budget details

Set the time unit by selecting "Days" or "Hours". Then you can set an internal as well as a customer budget.

You can have a warning about budget consumption generated and sent to you via e-mail as soon as the internal or customer budget is exceeded due to time bookings by the task team members.

Also, you can specify whether the budget can be overbooked. This setting can also be changed for ongoing tasks.

E-mail notification

Here, you can specify which employees should be notified of the set budget details by e-mail.

For cases where the customer budget or internal budget may be exceeded, several percentage values of the budget consumption can be entered.

E-mail notification		
Who should be notified?		~
When should notifications be sent?		
If budget details are changed		
When consumption exceeds		
when consumption exceeds	30, 60, 90	% of customer budget
When consumption exceeds	30, 60, 90	% of internal budget

Restrict bookings to

In case only a limited group of stakeholders should be able to book task budgets, booking can be restricted to a department, a company or a certain group of employees here. Only the employees specified can select this task for time recording in order to book times for it.

After saving, the task is created and is now available for booking in the *Time recording* application.
