

Preparing the first settlement

Before creating the settlement, check the following for the settlement period:

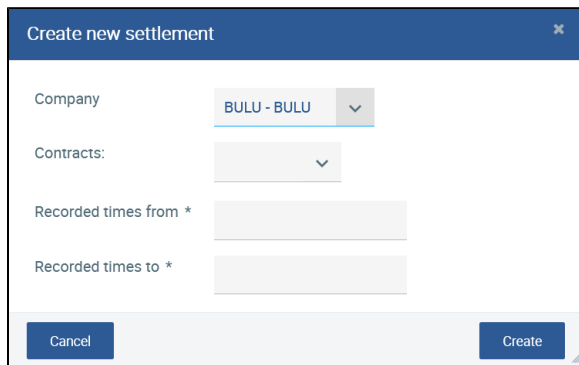

- No outstanding leave requests
- No outstanding time recording or missing completion of working time
- No booking cut within the settlement period

We recommend that you set a booking cut to the day of the settlement start before the first settlement run.

Note

When selecting a contract, only contracts that have been assigned to employees are displayed according to the setup.

To do this, go to the **Settlement** tile and select the **blocked URL** (Create new settlement).

Company

If you have several companies, please select the company you want to settle first. If you have only one company, the input value is preset.

Contracts

If you want to make a settlement at the same time for all employees, you do not have to select anything here. In case you want to do settlement at different times or for wages and salaries, filter by **contracts** that you have at best already defined in advance in Wages and Salaries.

Recorded times by

This is the first day to be accounted for, e.g. the first of the current month.

Recorded times to

This corresponds to the last day to be included in the settlement, e.g. the last day of the current month.

Then go to **Create**.

Settlement		Company	Recorded times from	Recorded times to
Company	BULU	BULU	May 1, 2021	May 31, 2021
Number of employees	2		Sum of working days	0.5 / 0.5
Sum of hours	0.0		Sum of each hour days	0.0

Employee	Regular work in hours	Additional work in hours	Regular work in hours	Additional work in hours	Regular work in hours	Additional work in hours	Regular work in hours	Additional work in hours	Regular work in hours	Additional work in hours
Johannes	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00
Anna	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

The data is set to 0 until the refresh/load.

To load the current settlement data for the period, press

In the upper area you will see the summary of the settlement.

[illegible]

Display duration as decimal

The status messages indicate in which cases there are discrepancies between the configuration and the booking. These records must be checked before finalising the settlement.
